

MONO SAE 40/50 SF/CD

REV.1 OF Mar /2017

LEVELS OF QUALITY

The lubricant MONO SAE 40 complies with the following international specifications:

API SF/CD

PRODUCT DESCRIPTION

DASÖL MONO SAE 40 is a monograde, seasonal and mineral-based lubricant, designed by using selected bases and new conception additives in cars and light commercial vehicles fitted with non-turbocharged petrol and diesel engines and it can be used under light conditions

It has been formulated with additives which reduce the formation of deposits, lacquers and sludges both at low and high temperatures. Furthermore it offers protection against rust, wear and corrosion and reduces the oxidation at high temperatures.

It is recommended to observe always the oil change interval as suggested by the car manufacturer.

TYPICAL FEATURES*

SAE Scale		40	50
Density at 15°C.Kg./dm3	ASTM D1298	0.870	0.870
Viscosity at 100°C.cSt	ASTM D445	12.8	16.5
Viscosity Index	ASTM D2270	130	130
Flammability V.A.°C	ASTM D92	210	210
Pour Point °C	ASTM D97	-15	-15

*The above mentioned values are indicative of production average values and are not an integral part of the specification.
